

Turning Point Community Programs FOCUS

Mission Statement:

Turning Point FOCUS is committed to providing quality services, support, and advocacy to children, adults and families experiencing mental health challenges.

Program Description:

The FOCUS Program is an intensive, mental health service designed to partner with families to provide a full range of coordinated therapeutic support services for emotionally challenged children and their families. Children referred to our program have been identified as being at serious risk of psychiatric hospitalization, residential care, or out-of-home placement due to the nature of their difficulties. To ensure that needs are met, the FOCUS Program provides support in the community environment where the need exists. Because the children who we serve do not always “fit in the box,” our services emphasize an approach that is individualized and that recognizes and utilizes the strengths of the family to affect positive growth.

Who is Eligible for Services?

Children between the ages of 0 and 21 and have been identified as being at serious risk of hospitalization, residential care or out-of-home placement due to the nature of their difficulties. FOCUS is designed to partnership with families to provide a full range of coordinated therapeutic and support services.
